Southeast University, Nanjing, China | (+86) 137-5390-1285 | xyzhang.gm@gmail.com | [xinyuezhang.xyz](mailto:xyzhang.gm@gmail.com)

EDUCATION

Southeast University

Nanjing, China

B.S. in Electronic Science and Engineering

Sept. 2017 to July 2021 (expected)

- GPA: 85/100.
- Joined the Knowledge Graph Research Group in Sept. 2019, supervised by [Prof. Meng Wang](#).
- Relevant Courses: Linear Algebra (I got **100/100** and a **scholarship** for this course), Advanced Mathematics (90/100), Programming and Algorithm Language (C/C++) (95/100), Computer Structure and Logic Design, Probability Statistics and Stochastic Process, Computer Network, Microcomputer System and Interface, Academic Writing, etc.

Imperial College London

London, Britain

Data Science Summer School (held by [Prof. Yike Guo](#))

July 2019 to Aug. 2019

- Experienced study abroad and finally made up my mind to do research.
- Relevant Courses: Introduction to Artificial Intelligence, Data Science, English for Academic Purposes, etc.

PUBLICATIONS

- **Xinyue Zhang**, Meng Wang, Muhammad Saleem, Axel-Cyrille Ngonga Ngomo, Guilin Qi, and Haofen Wang. Revealing Secrets in SPARQL Session Level. *International Semantic Web Conference (ISWC 2020)*. [[PDF](#)]
- **Xinyue Zhang**, Meng Wang, Bingchen Zhao, Ruyang Liu, Jingyuan Zhang, Han Yang. Characterizing Robotic and Organic Query in SPARQL Search Sessions. *APWeb-WAIM 2020*. [[PDF](#)]

RESEARCH EXPERIENCE

Studying user search behaviors in SPARQL session level

Nanjing, China

Supervised by [Prof. Meng Wang](#)

Jan. 2020 to May 2020

- Designed an algorithm to identify robotic queries to eliminate their interference in the data analysis of user behaviors. This algorithm has been published in **APWeb-WAIM 2020**.
- Defined the concept of SPARQL search sessions and how to identify it.
- Investigated potential correlations between SPARQL queries in the same session and provided a detailed analysis of query reformulations in single search sessions.
- Had 4 key findings of preference behaviors of human users during their information-hunting process using SPARQL.
- Provided an application example of the usage of findings, to illustrate the potentiality of utilizing user behaviors in search sessions in designing technologies that help users to search via SPARQL.
- This work has been published in **ISWC 2020**.

Sci-Magi Search Engine

Nanjing, China

Supervised by [Prof. Meng Wang](#)

Nov. 2019 to - (ongoing)

- The goal is to build an academic search engine that has the power of [Magi](#).
- Our team is responsible for building an ontology for all the academic fields, like [computer science ontology \(CSO\)](#). My job is to collect and pre-process academic data, as well as mining basic relations between academic fields.

PROJECTS

Real-time Style Transfer Glasses

Nanjing, China

Supervised by [Prof. Jun Wu \(Chinese website\)](#) in [this](#) lab

Oct. 2018 to Aug. 2020

- It's a **Student Research Training Program (SRTTP)** Project at **National Level**, in which I served as a **team leader**.
- Employed a device that can transfer the style of scenes in front of you in real-time and display results on glasses.
- Obtained a Chinese **Utility Model Patent** of *head-mounted style transfer device* (2019211895013).

CONFERENCE PRESENTATIONS

APWeb-WAIM 2020

Virtual

Presented our paper in Research Session: Data Mining.

Sept. 2020

- Joined the session and presented our paper: Characterizing Robotic and Organic Query in SPARQL Search Sessions, by recording videos in advance and doing Q&A online. [[PPT](#)]

RESEARCH INTERESTS

My research interests include but not limited to: Knowledge Graphs, Semantic Search, Information retrieval, User search behaviors, and Graph data analysis.
